- ❖ Provider Schedule not adding Multiple slots in one day for specific providers. In the simplest way it is working fine but in complex scenarios the calendar is not updating.
- ❖ Sometimes wrong/some other account data is fetched in my account from the database.
- ❖ When a new provider is added and click on add schedule, the scheduler screen already has schedules like time and date is selected. Wrong data fetched from DB.
- ❖ Sometimes a duplicate of a provider is generated.
- ❖ There are many UI issues.

Issues listed below are already reported and tested again today.

Sign Up	Sign up fields no validations Password validations not following up. First name and last name and checkbox is unchecked still redirecting to the next page no alert.
Add Business	Not working properly. Sometimes business got created, sometimes didn't. Business is created without selecting the location from the map. No, Location is provided from map / nor any address is entered still business is created no alert is shown. No, validations in any field (email, phone, name , last name etc) No option for edit business nor on live. Uploaded business image while creating new business. Once shown then disappeared. When clicking on a business schedule and clicking on add, data is updated but the page is still shown not moving to the next step / page.
Staff	Not working properly. Mostly can't add staff. Staff is overwritten. One provider is added in staff but when multiple providers are added some of providers are shown more then once. Showing irrelevant staff from another account. Fetching wrong data. Sometimes staff got added and sometimes didn't in relevant business.

	The Ellipsis menu (three dots) present under action in the staff module disappeared.
Add Provider Schedule	Add Provider Schedule from the staff menu got added from the staff module successfully but when Calendar module is opened nothing shown there. Month data is not shown.
Calendar	Keep loading. Not working fine. Schedules added from the staff module not showing respectively. Sometimes data shown sometimes didn't. Month tab data is not shown List view design is not fine, it is scattered.
Design	Responsiveness is not working fine. Design is scattered. buttons are overlapped. On different screen sizes UI is not fine.
Provider Profile	Can't edit.
User Profile	Not Completed. Inside Secondary email wrong placeholder in email field. Gender does not get selected.
List View	In the Action column Switch option is present which is not working and on ellipsis icon Add business and Provider Scheduler is present but not working.
